### **DETAILED ACTION**

This is a Notice of Allowance for application no. 10/053,492 in response to the After Final Amendment filed on December 5, 2005 where in claims 2-26 are presented for examination.

#### ***Allowable Subject Matter***

Claims 2-26 allowed.

Note the reasons for allowance of claims 14-26 are presented in the Office Action mailed October 5, 2005.

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a system and method for forming a three dimensional image by providing components of the image in a series of frames to an image space as required by the claims.

The closest prior art (US Patent 5,801,761 to Tibor) discloses a similar system and method of forming a three dimensional image. However, Tibor fails to particularly teach or suggest "wherein each zone of the light-shaping element scatters light into a predetermined trajectory" and " wherein each zone of the light-shaping element diffusely scatters light" as claimed by amended independent claims 8 and 11. These features taken with the others in the claims define over the prior art.

#### ***Conclusion***
